## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 18 through 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 18, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d). Claim 19 is similarly rejected for the recitation of "such as."

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 through 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (U.S. Patent No. 4,415,390 A).

Smith '390 discloses a machine for reinforcing an internal side of an embedded cylinder pipe with a composite structural reinforcement, said composite structural

reinforcement comprising at least a band of reinforcement fiber and a resin or resin including matrix, said machine comprising:

a contacting member (65);

a pressing member (68); and

a moving member (66);

where said contacting member and said pressing member are angularly shifted one from the other;

further comprising a band providing member (61).

With regard to claims 1 through 16, the method steps recited therein are inherent to the use of the device disclosed by Smith '390.
